

## 340B, worry-free.

### WHY PDMI?

It's the difference between a 340B program and a successful 340B program:

#### Flexible, Custom Design

We can easily configure our systems to match your data flow and reporting requirements.

#### Seamless Implementation

Our system accepts your data flow with no changes on your end.

#### Ongoing Optimization

We continually search for and identify volume, cost, missed dispensation, and replenishment opportunities.

#### Full Drug Formulary

PDMI easily handles CIIs and non-wholesaler products.

#### Regulatory Compliance

We perform quarterly true-ups to monitor and manage pharmacy inventory.

There's nothing easy about effectively managing and administering your 340B discount drug purchasing program. Unless you have PDMI on your team.

The 340B Drug Pricing Program is a valuable resource to the community and offers substantial clinical and financial opportunities to the 340B-covered entity and its pharmacy partners. But the reality is,

**340B can be time-consuming and complex.**

#### WE'VE CHANGED THAT.

A governmental program like 340B brings with it special considerations, exacting requirements and detailed procedures that participants must follow. PDMI's focus on creating custom pharmacy benefit solutions for our clients enables us to deliver a comprehensive, end-to-end 340B solution that makes managing eligibility, maintaining compliance, replenishing inventory and performing detailed reporting a seamless, effortless experience.

#### IT STARTS WITH ELIGIBILITY.

PDMI's 340B eligibility process means fewer missed savings opportunities and non-340B purchases. We customize our system to receive treatment data in your format, then authenticate eligibility through a series of checks and balances that includes verifying record of care, physician employment/contract status and that prescriptions are consistent with the scope of services. We then match, track and monitor NDCs to ensure you capture all available discounts. We manage the eligibility process from start to finish—and free the pharmacy from having to identify 340B-qualified prescriptions.

#### COMPLIANCE MADE EASY.

PDMI's approach to 340B allows you to build a comprehensive, integrated, easily auditable picture of eligibility: patients, drugs dispensed, health records, purchases and invoices. We take compliance seriously and stand behind our 340B services. We closely monitor the rapidly changing regulatory environment at both at federal and state levels for any impact on our 340B services and quickly incorporate any new opportunities or regulatory changes into our system.

## VIRTUAL INVENTORY, MANAGED WITH ACTUAL SIMPLICITY.

PDMI's 340B inventory and purchasing process means you don't need to maintain a separate 340B inventory—and that means improved cash flow. We interface directly with major pharmaceutical vendors to ensure seamless integration into your pharmacy's supply chain.

## WE TURN DATA INTO ACTIONABLE INFORMATION. YOUR WAY.

PDMI's clinical, financial, and management reporting tools are powerful and customizable, allowing you to easily monitor the effectiveness and efficiency of your 340B program. Use them to:

- Ensure complete and current audit trails for compliance and analysis of 340B activity.
- Gain visibility into where prescriptions are originating.
- Clearly understand, identify and/or quantify the total volume captured in the 340B-contracted pharmacies.
- Identify volume, cost, missed dispensation, and replenishment opportunities.
- Quantify your 340B savings by time period, drug, therapeutic class, and other user-defined categories.
- Track and trend sophisticated and complex protocols.
- Instantly organize and analyze claims, procurement and dispensing financial information.

**Anything missing?** With PDMI, you can build ad-hoc reports to suit your specific needs—at no extra cost.

## ADVANTAGES FOR THE PHARMACY

- Creates an established relationship with 340B-covered entity, resulting in increased traffic/volume in pharmacy, advertising, additional partnership opportunities, etc.
- Our eligibility validation means **no change to pharmacy's processes.**
- Seamless inventory replenishment. No need to maintain a separate 340B inventory.

## WITH PDMI'S 340B PROCESS, YOU GET:

- End-to-end, flexible and fully customized solution
- Exhaustive eligibility validation
- Comprehensive and customizable management, financial, program savings and compliance reporting
- Inventory true-ups; daily facilitation of inventory replenishment
- Banking/cash management
- Assistance in identifying and negotiating contracts with multiple pharmacy partners
- The cleanest contract in the industry; administrative fee-only; no hidden charges or fees
- PDMI's legendary client service
